For **INDUSTRIAL**

Versatile Flatbed UV Printer

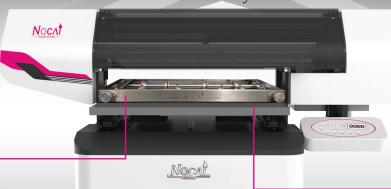

NC-UV0406FG

Multi-function uv printer

Cylindrical 360 degree rotation printing

NEWLY UPGRADED 2020 Small UV Flatbed Printer Machine with

Vacuum Table and Cylinder Print*

Drop size 1.5 pico liter

versified platform Motor mov

Rotary motor device can be added on the table for mugs and cylinder 360 degree rotation printing Support cylinder printing diameter 30-120mm

Max Print Size 600mm x 400mm

Nocai NC-UV0406FG is the Fourth Generation new model UV Digital Flatbed Printer 2020 has been more improved a lot based on old model such moveable panel, vacuum table, apply brief 4 color and white which easy to change, self-locking device, air purification systen, high precision, high speed, high quality printing with 1.5pl, and high performance price ratio. The unique white ink recirculation effetively void print head clogging and workable ink filter ensures pure ink from ink cartridge to print head and so on.

This model is designed for industrial bulk production with high printing speed using 1 print head, which can print on almost any material directly. With UV LED light irradiating during printing process, image on object surface are dry fast and sracth resisance. And can add rotary printing option device on the table.

//Advantageous features

Water Proof, UV Proof and Scracth Proof Finished products is Water Proof, UV Proof, and Scratch proof finished product is suitable for outdoor use.

Fast print image with white and color

The printing machine can print white ink and color ink print together/print simultaneously. (White + Color / Color + White)

Advanced mechanical structure assits value-addedprint product Personalized structure

Intelligent Control Panel

Convenient Maintenance

Air purification device

Intelligent ink supply system

NEWLY UPGRADED 2020

Humanized design Closed visible protective mirror, newly cover for eyes protection.

Intelligent ink supply system New board control with ink heat up system; apply brief 4 color and white which easy to change; ink recirculation inside the ink tube to avoid precipitation.

Printable size and Tickness

in thickness media

Nocal

cation system There is a air cleaning system under the bridge to avoid dust and moisture; choose the air cooling lamp, print can be dry at once, convenient operation

Vacuum Table

Auto height sensor system

Smartly detects the distance between the media and the print heads to protect them from collisions

New panel structure design

Newly control panel. more multifunctional, miss position of the control panel makes more comfortable and convenient to use

Max Print Size 600mm x 400mm

Max Resolution 1440dpi x 1440dpi

TECHNICAL SPECIFICATION

Model NC-UV0406FG (Fourth Generation) 2020 **Print Head** One Head EPSON Micro Piezo (Nozzle 180*6) Resolution 360dpi, 720dpi, 1440dpi Print mode color CYMK+WW / CYMKLcLm UV (UV curing ink) Ink supply system Continuous Ink Supply System (CISS) Max. material thickness Max. 180mm UV (LED UV Lamp) Drying system Flatbed Media handling Printing size Max. 60cm x 40cm Printing speed UP TO 4 sqm/hr Media Grass, Ceramic tile, Metal, Paper, Leather, Walpaper, Wood, Soft Film, PVC, Acrylic, PP, PE, Aluminium, Bamboo, Form Board, Plastic, etc X/Y/Z-axis motors Servo motors controlled + mute linear quideways Microsoft Windows 7 with RAM > 4Gb **Control System RIP Software** Photoprint Flexi 19 TIF, JPG, EPS, PDF, PNG, BMP, PDF Image format 220V(±10%); AC.50Hz/60Hz >400W **Power Supply** Temperature 20°C ~ 28°C Operation environment 35% ~ 65% Humidity Printer Dimension (L x W x H) 1390mm x 900mm x 670mm
